

why RWANDA. . .

Faith Church has partnered with World Vision to support the work taking place in Rwanda, Africa. This is a great opportunity because Faith networks with people who live in Rwanda and know what the specific needs of the area are. The workers in Rwanda are able to train and help people become self supporting. Faith does not want to go in and provide a temporary “fix” to a problem, but would rather give people the tools necessary to be successful for life.

Rwanda is considered the Great Lakes region of east-central Africa. Population is estimated to be over ten million. Rwanda is an impoverished country, severely impacted by HIV/AIDS, struggling to provide for its orphaned and vulnerable children, of whom thousands are in child-headed households.

what does your money support?

community care coalitions 🔄

Provide compassionate care for orphans, children, and people living with HIV/AIDS by working to provide for their most essential needs such as emotional support and grief counseling, life-skills training, health support, nutrition, income-generating opportunities, and improved access to education.

hiv/aids prevention 🔄

Provide values-based, age-appropriate life-skills training to primary school children, ages 5 to 15, in an effort to help them avoid risky behaviors that could lead to HIV/AIDS.

church partnerships 🔄

Equip, train, and mobilize area church leaders and their congregations to help meet the needs of orphans, children, and families living with HIV/AIDS.

child-focused community-based activities 🔄

Implement desperately needed infrastructure, such as constructing a well, building a school, providing vocational training and income-generating opportunities, increasing access to medical care, or equipping farmers with tools and resources to improve crop production.
